

# everbridge™ for K12 Schools

## Intelligent Safety Protecting K12 Institutions

In today's climate of rising safety concerns, higher education institutions—from universities and community colleges to vocational and trade schools—carry a critical responsibility to protect their students, faculty, and staff.

Everbridge empowers campus leaders with a proactive, integrated platform designed to respond swiftly and intelligently to any critical situation.

### Key Features of Everbridge for Higher Education:

- **Wearable Panic Buttons:** Enable instant, silent alerts to law enforcement and internal responders during high-threat events like active shooter incidents—without needing to unlock a phone or access an app.
- **Real-Time Communication & Mass Notification:** Deliver targeted alerts to students, staff, and first responders during emergencies. Whether responding to severe weather, campus lockdowns, or intrusions, Everbridge enables fast, multi-channel communication through text, voice, email, and campus signage.
- **Drill Automation & Compliance Reporting:** Streamline emergency preparedness by scheduling and logging lockdown, fire, and evacuation drills. Administrators can track participation and generate compliance-ready reports—eliminating manual effort while ensuring regulatory readiness.
- **Notification of Endpoints:** Trigger a coordinated emergency response the moment a panic button is pressed. Instantly activate connected systems like strobes, sirens, door locks, digital signage, and more—ensuring immediate awareness and protection campus-wide.

**Everbridge 360** offers more than just alerts—it's a unified safety ecosystem engineered to improve communication, reduce response times, and help institutions fulfill their duty of care with confidence and control.
