Turn Key Public Hotspot Connectivity Solution

The Public Hotspot Kit is an all-in-one solution that can be mounted to any fixed location (a building, a light pole, etc.) and provide secure wireless broadband access with cloud management capabilities using a nationwide cellular network.

Reliable and consistent access to the internet has cemented itself as a necessity nationwide. Public Wi-Fi Programs are quickly becoming one of the best ways of ensuring communities can participate in our connected world.

4G/5G Kit with Optional Solar Kit

Cradlepoint IBR900

*Ruggedized Gigabit-Class device with Wi-Fi

*5G Upgradeable with adapter

Common Uses

- Increase tourism through a public Wi-Fi amenity
