

Low Cost, Seamless, Secure, and Scalable Connectivity

In a world where providing reliable connectivity and real-time monitoring to remote systems are essential, The **RT410S provides a powerful 4G LTE M2M connectivity solution** designed to support a diverse range of businesses and organizations. Whether you're managing energy storage for homes, kiosks in stores, large vehicle fleets, vending machines or VR gaming in malls the RT410S ensures uninterrupted connectivity, allowing manufacturers and suppliers to efficiently monitor, maintain, and optimize their operations.

- **4G LTE Connectivity** – Ensures stable, high-speed data transmission for connectivity to remote environments.
- **GPS Enabled with LTE Diversity** – Track asset locations and enhance security with precise positioning leveraging Pintrac.
- **WiFi 5 & Ethernet Support** – Seamless wireless hotspot or wired connectivity for various IoT and mobile data applications.
- **Dual External Antennas** – Maximizes signal strength in challenging environments.
- **Compact & Durable Design** – Aluminum and plastic casing built for longevity and portability.
- **MDM Remote Management** – Enables remote communication diagnostics along with updates and provides GPS mapping.

The **RT410S is an essential connectivity solution** for businesses and organizations looking to enhance operational efficiency, security, and real-time internet access.
