Qualifying Questions

- 1 What initiatives do you currently have in place specific to worker safety?
- 2 What challenges are you facing today with your current safety program?
- 3 Are you currently exploring SOS or panic button solutions for your workers?
- 4 What check-in procedures are in place to verify worker safety during a critical event?
- 5 How does your team communicate with one another during a crisis?
- 6 In the event of an emergency, how are workers receiving notifications and updates?

Industry Overview

Unpredictable episodes of violence and crises are increasingly affecting workers, contractors, and the public across enterprise and public sectors. Companies are finding it challenging to ensure safety, emphasizing the importance of an organized safety plan for resilience. Everbridge's Mass Notification platform and panic button offer crucial solutions by enabling effective communication and rapid emergency response, enhancing security and preparedness in critical situations.

Key Features

- ◆ Wearable Safety Device and Mobile App: Personal safety devices and a comprehensive app for on-the-go incident management and communication.
- ◆ Direct Authority Notification: In emergencies, Everbridge instantly contacts relevant authorities, ensuring rapid response and coordination through integrated communication channels.
- ◆ Multi-Channel Alerting System: Rapid dissemination of critical information across various channels.
- ◆ Geotargeted Notifications: Targeted alerts based on specific geographic locations.
- ◆ Integration with Existing Systems: Ensures seamless compatibility with existing IT infrastructure.
- ◆ Custom Incident Templates: Tailored response plans for specific emergency scenarios.
